

System Industrie Electronic Group

Fact Sheet

Overview:

System Industrie Electronic Holding AG (www.sie-group.com) manages a global family of companies that supply electronics solutions, components and services to leading industry for applications in the medical, government/security and industrial markets all over the world.

Originally founded in 1994 in Lustenau, Austria, S.I.E. has seen steady growth through highly specialized research and development dedicated to targeted deployment in new and emerging markets. In 2009, the company acquired SIE Computing Solutions, Inc. (originally founded in 1971 in the USA and an ITAR-registered organization), and German firm GBS TEMPEST and Service GmbH to broaden its electronic packaging and distribution capabilities. The three synergistic companies now result in an organization of over 220 people worldwide focused on the development, testing, manufacture, and distribution of embedded computing solutions in accordance with ISO and other international industry-specific standards bodies.

Companies

System Industrie Electronic GmbH

System Industrie Electronic GmbH is a leading developer of electronic systems and components for medical, security and industrial computing applications. The company's extensive engineering expertise in mission-critical embedded computing extends from electronics, mechanics, software, and industrial design to manufacturing, and is also complemented with global logistics and distribution services for electronic components. Founded in 1994 in Lustenau, Austria as the origin of S.I.E. Holding, it is today a wholly-owned subsidiary of S.I.E. Group. Its customers include global industry leaders in regulatory-sensitive markets from medical imaging to data security, and more.

SIE Computing Solutions, Inc.

SIE Computing Solutions, Inc. specializes in rugged electronic packaging solutions for mission-critical embedded computing platforms deployed in harsh environments. Founded in 1971, the organization is vertically integrated and serves the military, transportation, oil & gas exploration, medical, telecommunications and other industrial/emerging markets from its headquarters in Brockton, Massachusetts. SIE Computing Solutions is an ITAR-registered company and now a wholly-owned subsidiary of S.I.E. Holding.

GBS TEMPEST & Service GmbH

GBS TEMPEST & Service GmbH is an official (German) Federal Office for Information Security (BSI)-accredited company specializing in the testing (Temporary Emanation and Spurious Transmission) of computer equipment and EDP systems to reduce compromising radiation according to the BSI's quality standards. Based in Diepholz, Germany, GBS GmbH has company security clearance from the Federal Ministry of Economics and Technology, and its customers include government partners such as NATO and the Federal Armed Forces, as well as many civilian companies.
